ABOUT ME

I (Jordan Bradfield) am an Intermediate level Full Stack Javascript Developer with 3+ years experience. I am currently working as an Application developer at IBM. I'm role agnostic and have experience as a developer, lead developer and team lead. I have a great personality, high motivation and a hunger for success. I strive to learn more and become better every day.

EXPERIENCE

IBM (June 2017 - Present)

At this role I worked primarily as a Full Stack Web and Hybrid Mobile Developer. Working as a lead developer to deliver a Mobile Solution for IOS/Android with a single code base using web technologies.

TECH STACK

+ Angular + AngularJS + Cordova + React
+ Redux + Node + Webpack + Grunt
+ LESS/SASS + Angular Material
+ React Material + HTML/CSS

IBM CO-OP (May 2016 - August 2016)

At this role I was assigned to build a MEAN stack Web Application as an internal IBM Project. I worked with a colleague to deliver a Full Stack Web Application using SSO, Socket.io and Web Mailing Services.

TECH STACK

+ AngularJS + Node + ExpressJS + Socket.io
+ MongoDB + Cloudant + Bluemix + NoSQL
+ Passport + Bootstrap + HTML/CSS
+ Node Mailer
